Joyce and Curt,

Please find attached the updated EM draft results. I am hoping to get the combined figures later today. Please let me know if you have any questions.

Thanks TJK

Thomas,

The attached maps provide the draft EM contour maps for the areas completed on November 29, 30, and December 1, 2017. EM anomalies are identified in pink that have no surface metal source. Surface metal locations with EM responses are shown in green. The main two potential drum areas previously located are identified and shown in pink on the map for Areas D, E and F. I have inserted red ovals over the drum areas for reference. Please contact me if you have any questions.

Regards,

Hi Thomas,

I have copied Ray in on this email, as he will be the one processing the EM data.

Thanks,

Jeremy Mitchell

Jeremy,

When will we receive the updated figures for the recent EM work for the Stratus Site in Erie?

Thanks TJK
